Prof. Dr. Arun Rai, Georgia State University, Atlanta, USA

Prof. Dr. Rolf T. Wigand, University of Arkansas at Little Rock, USA

5. Surveys and Case Studies

Survey “Relationship between IT governance and IT alignment”

Based on data from the 1,500 largest US banks we have tested a model to investigate the relationship between IT governance and operational business/IT alignment. The goal was to extend the view that strategic alignment is a core IT governance issue by also considering operational alignment in order to come to more precise insights into how governance mechanisms influence business process performance. Looking at the results, we could show the tantamount role of top executive support and operational alignment from a governance perspective, and finally that the impact of IT governance mechanisms on success is mediated by strategic and operational alignment.

For further details, please contact Frank Schlosser (frank.schlosser@uni-bamberg.de).

Survey “IT outsourcing relationships”

Analyzing data from a year 2008 survey on IT outsourcing relationships among the 1,000 largest German banks we assessed the role of control in maintaining trust in outsourcing relationships? Although the literature is quite rich on conceptualizing the relationship between control and trust in inter-organizational relationships, there exist quite sparse quantitative works which help to

evaluate the models developed. Concretely, the actual relationships between different modes of control and the level of relational trust in these relationships has been investigated. Additionally, we examined the role of service quality in this context. The results show that trust is positively related with most modes of control, and that there is indicative evidence that control supports trust in high-service quality situations while it leads to a reduction of trust in relationships suffering from bad service quality.

For further details, please contact Frank Schlosser (frank.schlosser@uni-bamberg.de).

Survey “Assimilation and Business Value Generation of Service-Oriented Grids in the Financial Services Industry”

Environmental turbulence as being illustrated by the current international financial crisis leads to a high degree of uncertainty in decision-making processes. However, in the financial services industry even in conventional economic cycles, demanding decision processes (e.g. the information systems assimilation decision process) are exposed to varying levels of environmental turbulence and institutional pressure (e.g., regulatory pressure). Against this background, collective mindfulness as organizational cognitive pattern is supposed to attenuate arising uncertainty and error in the IS assimilation process. So far, little empirical research has been conducted to quantify the impact of environmental turbulence and collective mindfulness on the IS assimilation and business value generation process in the financial services industry. This research approach contributes to practice by validating the role of organizational collective mindfulness in interacting with environmental turbulence and institutional pressure. Moreover, a thorough analysis of the drivers and inhibitors of Grid assimilation and its contribution towards business value generation in the financial services industry is provided. The conducted cross-country (North America, Europe), questionnaire-based field study aimed at C-Level IS executives among financial services providers allowing for in-depth cross-country comparisons.

For further details, please contact Martin Wolf (mwolf@wiwi.uni-frankfurt.de) or Jens Vykoukal (jvykoukal@wiwi.uni-frankfurt.de).

Survey “Green Computing through Grid Technology”

During recent years, IT-intensive industries are increasingly exposed to pressure for environmental sustainability in the technology assimilation process. This article provides a holistic and empirically substantiated perspective that is theoretically grounded on the complementary concepts of ecological and institutional pressure, as well as the role of top management as human agency. The derived hypotheses were validated based on 189 responses from IT decision makers in the U.S. financial services industry that have already implemented Grid technology as an instantiation of Green IT. The empirical results suggest the reconcilability of sustainable technology assimilation and Grid-induced business value generation.

For further details, please contact Jens Vykoukal (jvykoukal@wiwi.uni-frankfurt.de).

Survey “Communication Project”

Today's trend to a ubiquitous communication within large companies leads to new communication behaviors and capabilities. The central research goal of the joint research project between Deutsche Bank and the EFL is to find out: what are the changes in the profiles of communication behavior that emerge and how they differ across key groups? Moreover, a comparison of the cultural differences in the communication behaviors within the global acting company is planned. Finally, the overall “Business Value” of the company is influenced by those factors and thereby the communication policies can be improved.

To realize the comparison, a theoretical founded questionnaire is currently prepared and a survey in six different locations (Germany, Hong Kong, India, Singapore, UK, and USA) within Deutsche Bank will be conducted in the 1st quarter of 2010. Thereof gained insights are directly affecting the engaged communication technologies and policies of Deutsche Bank.

For further details, please contact Sven Weber (svweber@wiwi.uni-frankfurt.de)

Case Study Series “Risk Management in IT Projects”

Based on expert interviews on "how to mitigate risks in IT projects", we will conduct a case study series on risk management approaches and processes in IT projects. To get a comprehensive view of how risks are identified, managed, and mitigated in an organizational context of a financial services firm, we plan to interview around 20 project leaders, responsible for various IT projects aiming at performance increases at a German bank. To extend our understanding of risk management methods in detail, and take multiple perspectives of risk exposure, perception, and mitigation, around 20 members of one large IT project will be interviewed additionally. For further details please contact Michael Prifling (prifling@wiwi.uni-frankfurt.de).

Case Study “Services Sourcing”

The objectives of the “Management of Global Outsourcing Relationships” research project are to analyze a software development project of Deutsche Bank which being based on a global service delivery network. The focus of the study is to identify the types of conflict that arise in global IS outsourcing projects as well as to find out how conflict is being prevented respectively managed in this setup. As the case study applies an exploratory approach other multi-vendor management related topics will also be included in the analysis depending on their importance in the project. For further details please contact Katharina Vogt (katharina.vogt@email.de).

Case Study “Assessing Goal Satisfaction and Development Effort”

Requirements Engineering (RE) is a major part of any software development project. Within that phase, most of the whole project's effort is determined. However, due to lack of appropriate techniques, decisions on requirements are currently not related to the effort that they cause. Using data from a re-engineering project within Deutsche Bank, a prototype on assessing both goal satisfaction and effort is applied. Preliminary results promise valuable insights for improving decision making on requirements by providing information on caused effort. The case will be finished within 2nd half of 2009.

For further details, please contact Frank Zickert (mail@frankzickert.de)

6. Further cooperation with EFL partners and other companies

In our research project “IT project risk management” we pursue a long-term partnership with Prof. Mark Keil from the CIS department at Georgia State University (GSU), one of the leading institutions in the IS field. Prof. Keil has an outstanding research record on the topic of IT project management and recently provided professional research assistance on the analysis and publication of research results in this research project. Doctoral student Robert Gregory visited Georgia State University from February to May 2009 to extend this international research cooperation and produce valuable research findings for the involved EFL partners in this project. In addition, further research cooperations are going at between EFL researchers and top scholars from GSU, including Prof. Arun Rai.

Within the FinGrid project we cooperate with the three EFL partners Deutsche Bank, IBM and Finanz Informatik as well with the companies DataSynapse, Dresdner Bank and PA Consulting to design and develop prototypes of grid applications for the financial services sector. In 2007, the design and development of one of the three prototypes started. In 2009, the grid-based pricing and billing prototype (Deutsche Bank together with IBM) as well as the second prototype, a grid-based portfolio-performance prototype (DataSynapse and Dresdner Bank) was designed and implemented. Moreover, the implementation of the third prototype, an asset backed security grid-factory (Finanz Informatik together with PA Consulting), was finished in 2009.

Cluster 2
“Emerging IT Architectures to Support Business Processes within the E-Finance Industry”
Deliverables 01/2009 to 12/2009

1. Working Packages (WP)

1. WP: Enabling technologies for service ecosystems in the E-Finance industry				
Finance industry	lead	team	deliverable	delivered work
WP 1.1: QoS-aware composition and execution of service-oriented workflows	RS, NR	JE, NR, SS, AM	Paper 06/2009	DS, AP, SS, JE, NR, RS (2009): Process Reliability in Service-Oriented Architectures. In: Proceedings of the Third IEEE International Conference on Digital Ecosystems and Technologies (IEEE DEST 2009), p. 640--645, IEEE Computer Society, June 2009. ISBN 978-1-4244-2346-0.

3. Presentations

Repp, N. (26.02.2009):

Cooperation Mechanisms for Monitoring Agents in Service-oriented Architectures
9. Internationale Tagung Wirtschaftsinformatik, Universität Wien, Vienna, Austria

Repp, N. (05.03.2009):

Chair KiVS-Workshop "Service-oriented Computing", Fachtagung Kommunikation in verteilten Systemen 2009, ITG/GI, Kassel, Germany

König, A. (06.03.2009):

Issues, Challenges and Opportunities of Setting up Experimental Peer-to-Peer Facilities - A Personal Story. Panlab Workshop on Setup and Operation of Open Testbed Infrastructures in the Context of NGN and Future Internet - Status Quo and Quo Vadis in conjunction with 16. ITG/GI Fachtagung Kommunikation in Verteilten Systemen (KiVS) 2009, Kassel, Germany

Eckert, J. (27.03.2009):

The Impact of Service Pricing Models on Service Selection
ICIW 2009, Fourth International Conference on Internet and Web Applications and Services, Venice, Italy

Papageorgiou, A. (28.05.2009):

Governance of a Service-Oriented Architecture for Environmental and Public Security
4th International ICSC Symposium on Information Technologies in Environmental Engineering (ITEE) 2009, ICSC Thessaloniki, Greece

Schuller, D. (02.06.2009):

Process Reliability in Service-Oriented Architectures
Third IEEE International Conference on Digital Ecosystems and Technologies (IEEE DEST 2009), Istanbul, Turkey

Niemann, M. (02.06.2009):

Qualitative and Quantitative Aspects of Cooperation Mechanisms for Monitoring in Service-oriented Architectures
Third IEEE International Conference on Digital Ecosystems and Technologies (IEEE DEST 2009), Istanbul, Turkey

Niemann, M. (02.06.2009):

Challenges of Governance Approaches for Service-Oriented Architectures
Third IEEE International Conference on Digital Ecosystems and Technologies (IEEE DEST 2009), Istanbul, Turkey

Repp, N. (02.06.2009):

Co-Chair Track "Governance in Large Heterogeneous IT Systems", DEST 2009 Conference, Istanbul, Turkey

Miede, A. (08.06.2009):

Security in Cross-organizational Service-oriented Architectures
KOM 5-Slides-Demo, TU Darmstadt, Darmstadt, Germany

Schulte, S. (08.06.2009):

Semantic Web Service Retrieval
Doktorandenkolloquium, TU Darmstadt, Germany

Steinmetz, R. (15.06.2009)

Selected SOA Research Challenges - Making Large Scale SOA Work
Software AG Colloquium, Darmstadt, Germany

König, A. (16.06.2009):

A Stochastic Analysis of Secure Joint Decision Processes in Peer-to-Peer Systems, Third IEEE International Conference on Communications (ICC 2009), Dresden, Germany

Miede, A. (22.06.2009):

Security in Cross-organizational Service-oriented Architectures
TeleTrusT Fachgruppe SOA Security, Darmstadt, Germany

König, A. (26.06.2009):

On the Implications of Adaptive Transmission Power for Assisting MANET Security, Third IEEE International Workshop on Wireless Mesh and Ad Hoc Networks (WiMAN 2009), Montreal, Canada

Niemann, M. (07.08.2009):

Towards a Consistent Service Lifecycle Model in Service Governance, Association for Information Systems (AIS): 15th Americas Conference on Information Systems (AMCIS 2009), San Francisco

Eckert, J. (08.08.2009):

The Implementation of Service-oriented Architectures in the German Banking Industry – A Case Study, Association for Information Systems (AIS): 15th Americas Conference on Information Systems (AMCIS 2009), San Francisco

Schulte, S. (08.08.2009):

Applied Service Engineering for Single Services and Corresponding Service Landscapes, Association for Information Systems (AIS): 15th Americas Conference on Information Systems (AMCIS 2009), San Francisco

Schuller, D. (16.09.2009):

From Web Service Policies to Automatic Deviation Handling: Supporting Semantic Description of Reactions to Policy Violations, Third IEEE International Conference on Semantic Computing (ICSC 2009), Berkeley

Miede, A. (12.10.2009):

Cross-organizational Service Security -- Solutions for Attack Modeling and Defense, Doktorandenkolloquium, Darmstadt

Miede, A. (17.10.2009):

Cross-organizational Security – The Service-oriented Difference, Herbsttagung 2009, "Anlegerschutz und Anlegernutzen - neun Thesen für die Zukunft des Privatkundengeschäfts", Frankfurt

Miede, A. (23.11.2009):

Cross-organizational Security – The Service-oriented Difference, Fourth Workshop on Trends in Enterprise Architecture Research TEAR @ ICSOC/ServiceWave, 2009, Stockholm

Miede, A. (26.11.2009):

Cross-organizational Service Security -- Solutions for Attack Modeling and Defense, ICSOC/ServiceWave PhD Symposium, 2009, Stockholm

Eckert, J. (16.12.2009):

Solving Resource Planning Problems – A Heuristical Solution, 11th International Conference on Information Integration and Web-based Application and Services (iiWAS 2009)

4. Guests

June 14-16	Professor Klara Nahrstedt, University of Illinois at Urbana-Champaign, USA
June 16	Prof. Dr.-Ing. Michael Zink, University of Massachusetts Amherst, MA, USA

5. Organized Events

February 02	Kompass-Workshop "Vom Suchen zum Finden - Einfluss semantischer Technologien in neuartige internetbasierte Wissensinfrastrukturen 2009" in cooperation with Intelligent Views and F.A.Z.-Institut
March 05	Chair KiVS-Workshop "Service-oriented Computing" Fachtagung Kommunikation in verteilten Systemen 2009, ITG/GI Kassel, Germany

April 30	Workshop "Software und Services der Zukunft gestalten - Neue Chancen durch serviceorientierte Architekturen und Anwendungen 2009" in cooperation with HessenAgentur / Hessen-IT
June 02	Co-Chair Track "Governance in Large Heterogeneous IT Systems" DEST 2009 Conference, Istanbul, Turkey
August 08	Minitrack-Chair "Enterprise Systems: Governance" AMCIS 2009, San Francisco, USA
September 28 - October 02	Workshop "IT-Governance in verteilten Systemen (GVS)" Informatik 2009, Lübeck, Deutschland

6. Surveys and Case Studies

SOA Case Study	Many financial institutions are currently implementing or planning to implement SOA as a part of their IT strategy, which is shown by various studies. In order to analyze the readiness of organizations and IT infrastructures with respect to the implementation of SOA the use of maturity models is commonly used in practice. The research aims at giving an overview of existing approaches and their use in the financial sector. Hereby, a special focus is on the role of SOA maturity models during pre- and post-merger phases, e.g., during IT due diligence. The conceptual work is afterwards evaluated using case study research within financial institutions in Germany. (In cooperation with IBM Deutschland GmbH, Global Business Services)
----------------	---

7. Further cooperation with EFL partners and other companies

DZ Bank	Joint project with Cluster 1 and DZ Bank with the title: Methods for Service Identification.
Software AG	In spring 2007, a cooperation with the Software AG was started with the aim to educate students in the field of Service-oriented Architectures. Based on this scenario a student project has been developed, in which the students had to develop a SOA-based online booking system. One focus has been on the continuous consideration of the business and IT requirements. The students had to do different tasks, e.g. to model the business process and to implement the SOA services. In spring 2009, a new project with a group of students was started, building a Service-oriented Architecture on legacy systems with Software AG technology. In addition, Prof. Steinmetz participated in the Software AG Colloquium, presenting state-of-the-art research of his team.
THESEUS	The Multimedia Communications Lab - KOM at the TU Darmstadt headed by Prof. Dr.-Ing. Steinmetz, is doing research in the context of the national project "THESEUS: Teilprojekt TEXO - Internet der Dienste" (http://theseus-programm.de/). The research focuses on Service-oriented Architectures (SOA) and is done in close cooperation with academic and

industrial partners, as TU München, TU Dresden, SAP AG, and Siemens AG.

PwC In September 2007, a cooperation with PricewaterhouseCoopers WPG AG was started. As a part of the cooperation IT Governance and Service/ SOA Governance are researched. Besides others, the aim is to publish academic papers, in which practical consulting experiences are brought together with academic approaches in the field of IT Governance. The cooperation is still active, building on regular meetings and information exchange.

8. Participation in external events

May 05	Finanz Informatik, SOA Exchange Workshop, Frankfurt
June 02	Governance in Large Heterogeneous IT Systems, Co-Chair Track , IEEE DEST 2009 Conference, Istanbul
June 22	TeleTrust, Workshop SOA Security, Darmstadt
December 01	IT-Governance in verteilten Systemen, 39. Jahrestagung der Gesellschaft für Informatik, Lübeck

Cluster 3
“Customer Management in the Financial Service Industry”
Deliverables 01/2009 to 12/2009

1. Working Packages (WP)

1.1. Customer Management Projects

2.1 Market Analysis: German Retailbanking Market	lead	team	deliverable	delivered work
Market analysis	BS	SCB	Report 04/09	BS (2009): Status Quo im Retailbanking 2008 In: Report, E-Finance Lab, Frankfurt

2.2 Acquiring Customers via Search Engine Marketing	lead	team	deliverable	delivered work
Research publication	BS	EG, TS	Paper 02/09	EG, TS, BS (2009): An Analysis of the Profitability of Different Bidding Heuristics in Search Engine Marketing (submitted to journal)

2.3 Share-of-Wallet's Mediating Role in Determination of Customer Profitability in Retail Banking	lead	team	deliverable	delivered work
Conference Paper	SG	TF	Paper 10/08	TF (2009): Share of Wallet's Impact within the Customer Metrics Relationship In: Proceedings of the 31 st INFORMS Marketing Science Conference, Ann Arbor, USA
Research Publication	SG	TF	Paper 04/09	ongoing, article submission 04/10

2.4 Financial Intermediaries on Electronic Credit Marketplaces	lead	team	deliverable	delivered work
Research publication	BS, MW	SCB, FG	Paper 09/09	SCB, FG (2009): Emergence of Financial Intermediaries on Electronic Markets: The Case of Online P2P Lending In: Business Research 2(1), pp. 39-65

2.5 Electronic Lending Marketplaces as a Source for Education Finance	lead	team	deliverable	delivered work
Research publication	BS, MW	SCB, FG	Paper 06/09	FG, SCB (2009): An empirical investigation of Student Loans on an Electronic P2P Lending Marketplace (submitted to journal)

2.6 Web 2.0 Applications in Financial Services	lead	team	deliverable	delivered work
Research publication	BS	CMM, SCB	Paper 06/09	SCB, CMM (2009): Babbling Before Banking? Online Communities for Pre-Purchase Information Seeking in Financial Services In: International Journal of Bank Marketing 27 (6),446-466

2.7 Customer Acquisition through Affiliate-Programs	lead	team	deliverable	delivered work
Research publication	BS	CS	Paper 01/09	CS (2009): Optimierung von Provisionen in Affiliate Programmen zur Maximierung des Verkaufsergebnisses In: Deutscher Dialogmarketing Verband e.V. (Hrsg.), "Dialogmarketing Perspektiven 2008/2009", S. 67-76; Gabler, Wiesbaden, Germany

2.8 Linking Customer and Financial Metrics to Shareholder Value	lead	team	deliverable	delivered work
Research report	BS	CS, TW	Conference paper 04/09	CS, BS, TW (2009): Customer-based Firm Valuation In: Doctoral Colloquium at the 38 th Conference of the European Marketing Academy (EMAC), Nantes, France
Research publication	BS	CS, TW	Paper 02/09	BS, TW, CS (2009): Customer-based Firm Valuation In: Campus for Finance – Research Conference, Vallendar, Germany (Best Paper Award)

2.9 Measuring Retention Rates with Respect to Heterogeneity	lead	team	deliverable	delivered work
Research publication	BS	JH	Paper 01/09	ongoing, article submission 02/10

2.10 Customer Equity Reporting	lead	team	deliverable	delivered work
Conference paper	BS	MB	Paper 04/09	BS, MB, LH (2009): Now or Never: Using the Financial Crisis to Get Serious about Customer Equity Reporting (under review)
Research publication	BS	MB	Paper 07/09	Ongoing, article submission 08/09

1.2. Fingrid Projects

4.1.1 Market Analysis 1: Evaluation of the German grid market	lead	team	deliverable	delivered work
Research report	OH	CMM	Conference 02/09	ongoing
Market analysis	OH	CMM	Report 04/09	CMM (2009): Grid-Technologie in deutschen Unternehmen – eine empirische Studie, In: Hinz et al. (Hrsg.) (2009): "Grid Computing in der Finanzindustrie", Books on Demand, Norderstedt.
Research publication	OH	CMM	Paper 07/09	ongoing

4.1.2 Adoption of grid technology	lead	team	deliverable	delivered work
Research publication	OH	CMM	Paper 05/09	CMM (2009): Adoption of GRID computing: An empirical verification of an inter- and intra organisational approach, In: Pacific Asia Conference on IS 2009, Hyderabad, India. (Best Paper Award) CMM, OH (2009): Explaining the Adoption of Inter-Organizational Systems: An Integrated Institutional Theory and Organizational Capability Approach (under review)

4.1.3 Case Study	lead	team	deliverable	delivered work
Report	OH	CMM, ML	Report 10/09	ML (2009): Grid Computing – Die nächste Generation des Resource Sharing, In: Hinz et al. (Hrsg.) (2009): "Grid Computing in der Finanzindustrie", Books on Demand, Norderstedt.

4.2.1 Static Pricing	lead	team	deliverable	delivered work
Analysis of the Design Space	BS	ML, OH	Report 04/09	ML, OH (2009): Pricing the Grid – Bepreisung des Grids, In: Hinz et al. (Hrsg.) (2009): "Grid Computing in der Finanzindustrie", Books on Demand, Norderstedt.
Allocation Efficiency Analysis	BS	ML, OH	Report 03/09	Ibidem.

4.2.2 Dynamic Pricing	lead	team	deliverable	delivered work
Analysis of the Design Space	BS	ML, OH	Report 04/09	Ibidem.

4.2.3 Optimal Tariffs	lead	team	deliverable	delivered work
Cutting Costs with Grid Technology	BS	ML, OH	Paper 02/09	ongoing, article submission 02/10
Estimation of Willingness to Pay	BS	ML, CMM	Paper 12/09	ML, OH (2009): "The Pricing of Grid Services in Enterprises: Empirical Results on Preferences and Willingness-to-Pay".

BS: Bernd Skiera	SCB: Sven C. Berger	TF: Tanja Frischmann	JH: Jeanette Heiligenthal	EG: Eva Gerstmeier
TS: Tanja Stepanchuk	CS: Christian Schulze	CMM: Christian Messerschmidt	ML: Markus Lilienthal	OH: Oliver Hinz
MB: Manuel Bermes	SG: Sonja Gensler	TW: Thorsten Wiesel	LH: Lutz Horn	FG: Fabian Gleisner

4. Further cooperation with EFL partners and other companies

- Deutsche Bank (1) In this project we empirically analyze the impact of incentives for the acquisition of new customers on customer equity. Based on those results we develop a model that allows for maximizing customer equity by determining the optimal value of the incentive.
- (2) In a joint seminar on “Web 2.0 applications in financial services” together with DB Research and online banking experts from Private & Business Clients, students develop the essentials of web 2.0 driven online marketing strategies in the financial services industry. An additional analysis of survey data allows to identify target segments for specific applications in the field of retail banking.
- Postbank Many companies collect substantial information regarding their interactions with their customers. Yet information regarding their customers transactions with competing firms is often sparse or non-existent. As a result, firms are often compelled to manage customer relationships based on an inward view of their customers. It is the objective of this project to develop a survey-based approach to augment firms’ internal records with insights regarding their customers’ relationships with competing firms, including the size of each customer’s wallet and the firm’s share of it.
- GfK Communities form the basis of interaction among customers on the web. The primary aim of this project is to determine the characteristics of community users and the identification of customer segments with high affinity to community interaction. The secondary aim would be the derivation of generic management implications for companies.
- Cocomore AG Especially in times of crises when budgets for sales and marketing are very limited, affiliate marketing offers a cost efficient way of acquiring new customers. Through our cooperation with Cocomore AG, a media agency, we refined and tested our model for setting optimal commissions in affiliate marketing in an empirical setting.

5. Awards

Christian Schulze was awarded the Best Paper Award, 3rd price (500 EUR) at the WHU Campus for Finance Research Conference 2009 for his joint work with Bernd Skiera and Thorsten Wiesel on “Customer-Based Firm Valuation”.

Oliver Hinz received the Best Dissertation Price (10.000 EUR) of the EHI Retail Institute for his dissertation “Interaktive Preismechanismen in dynamischen Märkten”.

Christian Messerschmidt was awarded the Best Paper Award at the Pacific Asia Conference on IS 2009 for his work “Adoption of GRID computing: An empirical verification of an inter- and intra-organisational approach”.

Cluster 4
“Reshaping the Banking Business”

4. Surveys and Case Studies

Research Survey
Private Equity im deutschen Mittelstand

Litty, T.; Rauch, C. (2009)

Research of Cluster IV regarding the perception of Private Equity investments in German small and medium-sized enterprises (SMEs). The study especially investigates the perception of SMEs' management teams regarding chances and threats of Private Equity companies. Background of the survey is the limited lending of banks, due to both the financial crisis' credit crunch and the introduction of Basel II leading to a reduction in lending to SMEs. Results

showed that the majority of management team has no positive perception of Private Equity companies and predominantly feels threatened by the loss in control. Yet, results also showed that this perception is mostly not based on insight knowledge but on prejudice shaped by the ongoing discussion about financial investors ("Heuschrecken") in Germany.

Research Survey

The investment behaviour of Corporate Venture Capital firms in Europe

Litty, T.; Rauch, C. (2009)

The survey tries to shed light on the strategies and characteristics of Corporate Venture Capital firms in Europe. Although prior research has mostly focused on Venture Capital or "classic" Private Equity, relatively little is known about the venture programs of big corporations. The survey therefore analyzes the investment behavior, the way in which corporate venture programs on portfolio companies work together and consequently what the success determinants of the joint work are. We find that the investment behavior is similar to "classic" venture capital firms, yet the success strongly depends on the close working relationship between the corporation backing the venture program and the investees.

Case Study/Survey

„Kunden mit Migrationshintergrund"

Gleisner, F.; Pohl, P. (2008):

The joint research project of E-Finance Lab Cluster 4 and Deutsche Bank deals with the needs and demands of Turkish retail banking customers in Germany. The study is based on a survey which investigates the relationship between Turkish bank clients and German banks in Germany. This work is combined with the actual products and services offered by the Deutsche Bank through its subsidiary Bankamiz. The two projects jointly analyze the behavior of Turkish bank customers in Germany and the way in which German banks deal with the special needs of those non-German customers.

„Computer im Börsenhandel auf dem Vormarsch“
Handelsblatt.com

7. Software

Design and implementation of a tool for conducting Delphi studies on the basis of open source technologies such as Java Server Pages, Java Beans, Apache, and MySQL.

8. Surveys and Case Studies

Delphi Study on “The Future of the European Post-Trading System in the Light of Globalization and the Financial Crisis”: Using the Delphi methodology, the Chair of e-Finance and Cluster 5 of the E-Finance Lab conducted a study among 158 experts from different areas of the post-trading industry aiming to develop a joint and coherent view of how the European post-trading system will look like in the future. The study identifies measures for improvement of the post-trading system and the most important issues in risk management and information technologies within this industry.

9. Further cooperation with EFL partners and other companies

The project “**Assessing the IT Business Value in the Investment Funds Industry on a Business Process Level**” has been conducted in cooperation with our EFL-partner DZ/Allfinanz Gruppe (Union IT Services). Within a first cooperative project, the back-office investment processes of a large investment funds company were modeled. Based on these models, we will continue to work on an adjacent cooperative project. Thereby, the modeled investment processes serve as input to the identification of suitable measures to quantify (potential) efficiency gains from the automation of (back-office) processes.
